

BLUE VALLEY BEHAVIORAL HEALTH

MEDICATION NOTICE

Please be aware if you cancel or miss an appointment with your Medication Management Provider (MD or APRN), your prescriptions will not be refilled. To assure quality of care, our providers need to see you to evaluate the effectiveness of your medications.

CLIENT ROLE IN MEDICATION SAFETY

As a client of BVBH, it is important for you to keep your BVBH provider informed of any changes in medications you are taking or being prescribed by providers other than BVBH. These changes would include:

- New or discontinued medication;
- Dosage or frequency change;
- Use of any OTC (over the counter) medication, including herbal supplements

For your safety, it is recommended that you:

- Provide your Primary Care Provider with a current list of all of your medications;
- Carry medication information on your person in case of an emergency; and
- Discuss any concerns with your medication with the prescribing provider.

Thank you.
