

BLUE VALLEY BEHAVIORAL HEALTH

MEDICATION NOTICE

Client's Name: _____

Case #: _____

Please be aware if you cancel or miss an appointment with your Medication Management Provider (MD or APRN), your prescriptions will not be refilled. To assure quality of care, our providers need to see you at regularly scheduled appointments to evaluate the effectiveness of your medications. Failure to maintain appointments will result in your chart being discharged due to non-compliance, and medications will no longer be prescribed.

Refills for medications prescribed by Blue Valley Behavioral Health Providers must be requested 5-7 days prior to being out of medications to ensure they will be ready when needed.

CLIENT ROLE IN MEDICATION SAFETY

Blue Valley Behavioral Health must abide by individual pharmacy policies regarding early refills, lost, or stolen medication. If a client states medications have been stolen, a police report must be provided to Blue Valley Behavioral Health for consideration of early refill authorization and will be reviewed on a case-by-case basis by the medication provider. This does NOT guarantee the client's medications will be refilled based on insurance policy, pharmacy policy, and refill history in the National Prescription Drug Monitoring Program.

As a client of BVBH, it is important for you to keep your BVBH provider informed of any changes in medications you are taking or being prescribed by providers other than BVBH. These changes would include:

- New or discontinued medication;
- Dosage or frequency change;
- Use of any OTC (over the counter) medication, including herbal supplements

For your safety, it is recommended that you:

- Provide your Primary Care Provider with a current list of all of your medications;
- Carry medication information on your person in case of an emergency; and
- Discuss any concerns with your medication with the prescribing provider.

Thank you.
